

Unparalleled Ecommerce
Experience Through
Magento Implementation
& Integration

CASE STUDY

ABOUT CYM DISTRIBUTORS

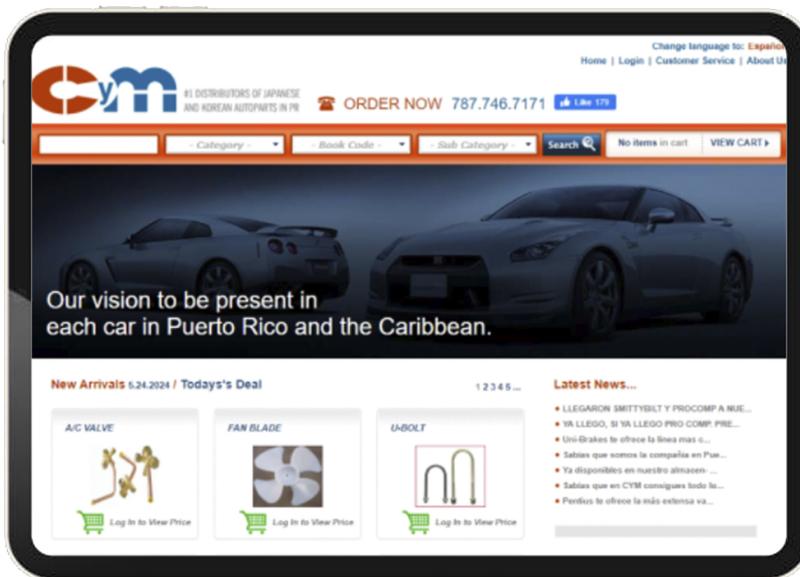

CyM Distributors is emerging as one of the biggest and constantly growing aftermarket auto parts wholesalers, situated in Puerto Rico. They have been serving the local as well as the Caribbean market since the year 1987.

CyM Distributors has more than 100,000 SKUs available in their repository for original and replacement parts. They serve parts for Jeep, Korean and Japanese cars in their large facilities.

Currently, CyM Distributors import directly from the best parts manufacturers from a host of locations. These span over Japan, Korea, Taiwan, Peru, China, Spain, the USA, Italy, and other places with the primary objective of supplying a huge variety of quality part products for different clients in Puerto Rico as well as the Caribbean.

Ecommerce Services

- UI and UX Enhancements
- Magento 2 Implementation
- ERP Integration through DCKAP Integrator

Platform  **Magento™ 2**

Augumented Online Experience

A good website elevates a business and helps the audience in perceiving the **brand** better. This, in turn, plays a significant role in increasing the lead flow, so it is essential to make sure that the website's **user experience** is not just smooth but is also catchy.

- Grab the user's attention through varied details in the design
- Create an uncomplicated visual that's comfortably visible to the eye.
- Effortlessly search what the consumers are looking for in the website
- Provide ease by not directing the users through challenging navigations and category pages
- Easily convey the product, service, or solution provided by the company

Other Integrations & Extensions

Using extensions, be it a third party or your very own extension that fulfills the requirements of an **ecommerce** store, tends to add greater value to the performance of the store. The advancement in technology has made the ecommerce space more competitive than ever before, so, in order to stand out, we tend to rely on these extensions to improve the functionalities of the **online store**.

The Integral Transformation

CyM was looking to implement a multiple invoice payment feature with 30-60 and 60-90 days options. Apart from syncing the products, they also wanted to sync the categories. And lastly, CyM required the addition of language inputs for English and Spanish (product titles, descriptions, etc.)

This is where **Klizer** came into the picture, and a **Magento 2** website was created. We understood all the requirements of CyM and started to work on the deliverables as per what they needed. Every requirement was implemented, and their website was revamped.

Other Integrations & Extensions

Seamless migration of data

B2B [ecommerce](#) business seems to be increasing more in number than in previous years. Apart from their offline business, B2B merchants have now started to opt for an ecommerce business. The developers at Klizer have implemented a number of [B2B](#) features for [CyM](#).
